

SAVE OUR BEACH

On Tuesday, April 14, Walton County Commissioners are being asked to take the next step forward in a misguided and costly plan that will ruin our pristine beaches.

Walton County politicians, led by TDC Executive Director Jim Bagby, want to turn our sugar-white beaches dirty brown. The beach nourishment project will trample private property rights, and the U.S. Army Corps of Engineers has said it will cost taxpayers an estimated \$164 million. Let your commissioner know this is a bad plan.

Walton County's sugar-white beaches will be covered by dirty brown sand

The proposed beach nourishment project will cost taxpayers more than they say

Walton County politicians want to grab the property rights of hundreds of property owners

Save our beach. Protect taxpayers. Defend property rights.
